**FOR IMMEDIATE RELEASE**

# AMETEK HDR POWER SYSTEMS Announces Certification of Compliance to ISO 9001:2000 Certification

On March 2, 2005, **AMETEK HDR Power Systems** Columbus, Ohio, received certification of compliance with **ISO 9001:2000**. This is just the latest in HDR's ongoing process of obtaining and maintaining worldwide manufacturing standards.

With **Bob George (AMETEK Solidstate Controls Director of Quality)** leading a team of key HDR personnel, preparation for ISO certification was undertaken in late 2004. **Barb Emery**, as Management Representative, played a key role in making sure the team stayed on track. Since ISO requirements compel organizations to adapt the process controls necessary to achieve predictable, repeatable results, having complete buy-in and cooperation of everyone, from top management down through the entire organization is critical. The ISO Team members made sure that everyone was integrated into the process, making sure that schedules were met, and milestones were achieved.

ITS Intertek Services was the first accredited ISO 9000 registrar in the United States. Since 1991, ITS Intertek has been extremely active in engaging U.S. manufacturers in the ISO process. "Being ISO certified has a great recognition internationally, and even domestically", stated Bob George. "Many companies use this as a benchmark, and base purchasing choices on companies that are ISO certified.

Achievement of ISO9001:2000 certification reflects HDR's dedication to fulfilling their pledge to their client's needs and requirements. This also assures continuous growth and improvement internally", added Bob. "Besides being significant to outside clients, it has a major effect on HDR as a company. We know we are doing our jobs, and our processes are adhering to a consistent standard. It demonstrates a level of commitment that can't help but improve our processes, resulting in a better product quality", Bob concluded.

AMETEK HDR Power Systems manufacturing facilities are located at 3563 Interchange Road, Columbus, Ohio 43204-1400. All products are marketed through an independent network of manufacturer's representatives and distributors in the United States and foreign countries. Commitment to the customer continues long after the sale with a worldwide network of skilled, experienced field service technicians available for installation, on-site service, and training.

For additional information, please contact AMETEK HDR at the above address or phone 1-888-PWR-CNTL(797-2685) or by fax at 1-614-308-5506.
